Do You Need an *Enterprise* Version of Excel®?

3C SOFTWARE

We know why you love Excel® for costing and profitability analytics!

It's familiar and easy to use

Collaboration is possible because everyone uses it

You can model almost anything with it

You own your data & are solely responsible for any changes

We want you to consider an alternative to Excel® that offers enterprise functionality.

ImpactECS is an enterprise-wide cost and profitability system that combines the flexible, end-user driven capabilities of Excel® with the features of a robust financial system to create a consistent environment to accurately calculate costs and profits for your organization.

Centralized data from ERP, finance, operations and database systems is stored on protected servers and user-based permissions define who has access to view and modify the model. ImpactECS has scalability, security and the ability to track all activity.

ImpactECS		Excel
System		Spreadsheet
Role-based security		Limited security
Complete auditability	VS	Limited ability to track changes
Scalable to handle large volumes of data		Poor performance with large data sets
Ability to centralize data		Limited ability to share data and results
Exposes true impact of changing variables		Variance analysis based on assumptions

Build confidence in your analysis with a robust, integrated approach.

Benefits of the ImpactECS Enterprise Cost and Profitability Platform

- Integrated, end-to-end detailed view of business

- Ability to quickly create dashboard and reports, manage data, and access security

- Simulations leveraging custom simple end user forms-create custom interfaces for different uses and to manage data access security

- Easy comparison of results from multiple workbooks and scenarios

- Forward looking analysis and the capacity to create "what-if" scenarios with complete visibility

Consistent environment to calculate results
Companies can enforce common methodologies for calculating costs and profits and have access to a centralized source of data.

World class performance and scalability
ImpactECS can handle large quantities of data and can grow with your organization's needs.

Familiar user interface
ImpactECS has a familiar Windows-styled interface and models are maintained by accounting or operations personnel.

One stop for all of your costing & profitability needs
ImpactECS gives you the ability to calculate, analyze, report and share cost data in one system. Whether you need to calculate multiple cost sets, understand transportation costs, value inventory, or perform any other sophisticated analysis, **you can do it with ImpactECS**.

With a true modeling platform, you can gain true insight into your costs and profits.

A few features of ImpactECS

By switching to an enterprise cost and profitability system, you get:

A Configurable and Flexible Tool
Custom models that are configurable to represent unique business rules and can evolve to support changes in the business

A Robust Calculation Engine
Easily shared calculations where you can write and maintain in one place, with the ability to log errors and continue processing and debugging for calculations

Easy Integration
Integration with ERP and other enterprise applications with robust database capabilities and works with SQL, Oracle & SAP HANA

Better Security
Data is stored on protected servers and user-based permissions define who has access to view and modify the model

We're 3C Software

We help manufacturers get to the answers needed to effectively run the business by implementing **enterprise cost and profitability solutions** to some of the world's most recognized companies.

Specialized implementation teams to handle challenges unique to costing and profitability analytics.

Over 120 customers and 600 installed locations at companies in 4 continents (North America, Europe, Asia, and Australia)

Internal product development team builds and maintains ImpactECS

ORACLE® **Gold Partner**

SAP Partner
